

CASELLE® Access 2.x – Network

Network System Requirements

Important! Using servers, workstations, or servers and workstations that do NOT meet the specified network system requirements may result in unsatisfactory performance and response times.

Recommended

Network Server Operating System Microsoft® Windows Server 2003 or Server 2008.

Network Server Equipment

- Pentium® IV 2.6 Ghz (or higher)
- 512 MB of available RAM
- 36 GB SCSI Ultra 160 disk space
- Color SVGA .28 Monitor
- 100 mbit Ethernet Network Card
- 100 mbit Ethernet Switch
- 48x CD-ROM drive

All hardware must be Microsoft® /Novell® certified (request printed certification documents).

Network Server and Database Server Power Protection Same as required.

Workstation Computer

- Pentium® IV 2.6 Ghz (or higher)
- 512 MB of available RAM
- 30 GB available disk space
- Color SVGA .28 Monitor
- 48x CD-ROM Drive

All hardware must be Microsoft® /Novell® certified (request printed certification documents). Celeron and Sempron processors are NOT recommended.

Workstation Operating System Microsoft® Windows XP Professional, Windows Vista, or Windows 7 Professional

Workstation Power Protection Same as required.

Backup System Same as required.

Data File Transfer Same as required.

Printer HP® 5, 6, or 7 series. HP® 4000-5000 series, or IBM® Network Printer 17

Internet Access Same as required.

Explanation: Caselle® Applications require Internet access to download program updates. Using an Internet connection that is slower than 56 Kbps will take significantly longer to download data.

Email Same as required.

Network Installer Same as required.
