Utility Supplemental Billing

POWERING COMMUNITIES

UTILITY

Take advantage of the extensive billing options with Caselle Utility Supplemental Billing. This module is perfect for the billing clerk who needs to bill for services that are imported from a different software and that all need to appear on a single bill.

Utility Supplemental Billing simplifies the interface with other billing software. You can send out billing from another billing organization or software. Import billed amounts or quantities to Utility Supplemental Billing. This simple process allows you to use your existing utility bill for the additional billings, thus reducing time and cost. Now you can turn a task that used to be a headache into a quick and seamless process.

BENEFITS

- Import amounts billed from another billing software or organization.
- Set up customized rate formulas for billing quantities imported from a third party.

EFFICIENT

- Include third party information on the utility bill.
- Avoid manual billing by importing all information at one time.
- View detailed or summarized imported information on reports and in Customer Inquiry.

FLEXIBLE

- Import to one or multiple services at one time.
- Import billing descriptions or assign a set description.
- Review imported information through Customer Inquiry prior to processing billings.

ENHANCES

- Utility Management
